Work Experience

Web Developer @ Evozon Systems

2012 - 2023

Developed Magento themes for large e-commerce companies, enhancing their online presence and improving the user experience.

Implemented professional WordPress themes for presentational websites, showcasing brands' unique identities and capturing audience attention.

Collaborated with Laravel backends to build responsive and intuitive frontend interfaces, optimising performance and delivering seamless user interactions.

Utilised React Native framework to develop mobile applications with cross-platform compatibility, expanding businesses' reach to a wider audience.

Used responsive web design techniques from the early days of responsive, ensuring optimal user experiences across various devices and screen sizes.

Designed and implemented scalable frontend structures for large-scale applications, enabling efficient development, and future expansions.

Created complex Vue.js components for large-scale applications.

Front End Developer @ Braintuitive

2011 - 2012

Developed handmade Wordpress templates with custom functionalities to meet the unique design requirements of our clients.

Created frontend interfaces for Zend-based backends, using mustache.js as templating engine, jQuery, jQuery Mobile, and preprocessors like LESS.

Implemented admin panel templates from scratch, without relying on any frameworks.

Tested websites using six separate browsers on four separate computers at the same time (IE11 era).

Front End Developer, Contractor

2006 – 2010

Developed Photoshop to Wordpress templates, properly translating design concepts into functional websites.

Created presentation website for a luxury kitchen furniture company, incorporating PHP backend functionality to enhance the user experience.

Designed and implemented custom WordPress templates, resulting in seamless website setups for various clients.

Utilised my expertise in Photoshop to create original designs that were successfully transformed into fully functional WordPress templates.

Worked in desktop publishing as a layout editor for a daily newspaper, where I updated the production by transferring the design from QuarkXpress to inDesign.

Education

Babeş-Bolyai University, Cluj Napoca (2003 – 2006)

Attended the Faculty of Mathematics and Computer Science

Kölcsey Ferenc High School, Satu Mare (1995 – 1999)

Computer Science

More about me

In my next job it's important that...

I can create something new and important while developing myself further every day.

My favourite technology is...

React. It's future proof; it's modular; it's readable, scalable, modern, and well structured.

At work I'm best at...

transferring design ideas into proper front end, seeing the structure behind the curtains.

I want to work with people who...

love what they're doing.

Interests

Producing electronic music, tinkering with my linux homelab.
